Currency	£ GBP
Annual management charge	0.30% + VAT *
Annual yield (current)	1.48%
Ongoing charges figure ('OCF')	0.70%

* Not including platform fees

Investment update - August

Rising COVID-19 cases as well as questions over refreshed fiscal stimulus measures contributed to investor sentiment waning in September, as equity market returns around the world flattened in sterling terms. Indeed, the pace of economic recovery seems to be losing some momentum since the rebound in activity seen in the summer months. With winter around the corner, the outlook for markets continues to be cloaked in uncertainty and impacted by assumptions on the spread of COVID-19 and the potential for renewed lockdowns. There are some areas where greater longer-term opportunity seemingly exists, namely the US and Asian markets, as the benefits of geographic diversification come to the fore. With this in mind, our Investment Committee undertook a further redistribution of the strategy's equity exposure in September by reducing its allocation to the UK stockmarket and reinvesting the proceeds into the US. The newly added AXA Framlington Global Technology fund should take advantage of the recent sell-off in US 'big tech' to increase exposure to an area likely to remain in vogue as the world adjusts to the 'new normal'. The strategy retains a broadly neutral commitment to stockmarkets, which is in line with our longer-term strategic positioning. The asset allocation change means that circa 50% of clients' stockmarket exposure is allocated to the US and around 80% of equity investment is exposed to more vibrant economies and opportunities outside the UK.

Risk Targeted Managed Service

Our Risk Targeted ('RT') Managed Service is available directly through our Bordier UK platform or via the Novia, Standard Life and Transact platforms. There are five actively managed investment strategies available, each with different levels of risk and expected return, that are rigorously mapped within a specific Dynamic Planner risk profile tolerance. Each can be held within general investment accounts, ISAs, SIPPs and other wrappers (platform dependent).

Investment objective

To build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect reasonable correlation to stock market behaviour and rewards, including quite sharp fluctuations in values, but also some protection in times of market weakness.

Risk category

The strategy is managed in accordance with DP risk profile 5 and is part of their Risk Target Managed ('RTM') offering. The strategy's expected volatility is targeted to stay within the assigned DP risk profile's boundaries.

Model performance

	YTD	2019	2018	2017	2016*

Cash	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	OW (+) Overweight

As at 30/09/20

*Positioning prior to last Investment Committee meeting

Headline positioning

- ~ Equity exposure remains around neutral, with approximately 8.0% of our stockmarket exposure now outside of the UK.
- ~ We maintain our increased corporate fixed income exposure, specifically targeting the higher quality investment grade space.
- ~ Cash levels have been reduced to neutral.
- ~ There remains a focus on high levels of liquidity in everything we own.
- ~ Market neutral alternative investments continue to act as stabilisers. We were right to sell our structured investment funds last Autumn.
