Investment update - November

World equity markets had one of the best months on record since 1989 in November, rallying on the back of the news of effective vaccines against COVID-19 and the possibility of vaccine roll outs in the near future. This, much needed, positive news was preceded by Joe Biden's US presidential election, which was also viewed favourably by markets. The 'Goldilocks' outcome of a potentially divided Senate / House of Representatives and avoidance of a 'Blue Wave' was viewed as the best outcome from a market perspective, in part because it seemingly makes significant tax increases and reforms of 'big tech' and sectors such as healthcare less likely. No changes were made to the strategy in November. The total allocation to global stockmarkets remains unchanged, with around 80% of equity exposure lying outside of the UK where we believe greater longer-term opportunities exist. Our Investment Committee continue to closely monitor current events and are actively looking at economic areas and themes that will now be best placed to capitalise from the recent global policy shifts in Europe (European Green Deal), China (carbon neutral by 2060) and the US (Biden's presidential election victory - renewables and infrastructure).

Risk Targeted Managed Service

Our Risk Targeted ('RT') Managed Service is available directly through our Bordier UK platform or via the Novia, Standard Life and Transact platforms. There are five actively managed investment strategies available, each with different levels of risk and expected return, that are rigorously mapped within a specific Dynamic Planner risk profile tolerance. Each can be held within general investment accounts, ISAs, SIPPs and other wrappers (platform dependent).

Investment objective

To preserve capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect low levels of reward and a low correlation to stock market behaviour, including modest fluctuations in values.

Risk category

The strategy is managed in accordance with DP risk profile 3 and is part of their Risk Target Managed ('RTM') offering. The strategy's expected volatility is targeted to stay within the assigned DP risk profile's boundaries.

Headline positioning

- Equity exposure remains around neutral, with approximately 80% of our stockmarket exposure outside of the UK.
- We maintain our increased corporate fixed income exposure, specifically targeting the higher quality investment grade space.
- Cash levels remain at neutral.
- There remains a focus on high levels of liquidity in everything we own.
- Market neutral alternative investments continue to act as stabilisers. We were right to sell our structured investment funds last Autumn.
