Investment update - May

Equities made further progress in May; corporate earnings announcements, both in the US and elsewhere, have generally surpassed expectations so far this year and economic activity is picking up strongly in many regions. Key indicators such as Purchasing Managers' Indices are rising quicker than expected, while vaccine rollout programs continue to progress well and data around their efficacy remains encouraging. The outlook for inflation continues to be a key influence on markets. Headline inflation in the US again rose more than expected, however the rhetoric from the US Federal Reserve, which has talked down the prospect of changing rate policy, remains unchanged. The opening up of the economy in the UK is also leading to quite a dramatic recovery in retail sales, which is in turn driving pockets of price inflation in the short term. No changes were made to the strategy in May as our Investment Committee continues to believe that equity markets are well supported by the prospect of a broad global economic recovery and continued stimulus from governments and central banks. Company earnings announcements in key regions also look broadly encouraging and, as a result, each strategy remains at the upper end of their corresponding Dynamic Planner risk profile. Given the unclear outlook for inflation, our fixed interest exposure remains diversified, with allocations to corporate and inflation-linked bonds in addition to strategic managers who can pivot quickly to minimise risks or take advantage of mispriced opportunities.

Risk Targeted Managed Service

Our Risk Targeted ('RT') Managed Service is available directly through our Bordier UK platform or via the Novia, Standard Life and Transact platforms. There are five actively managed investment strategies available, each with different levels of risk and expected return, that are rigorously mapped within a specific Dynamic Planner risk profile tolerance. Each can be held within general investment accounts, ISAs, SIPPs and other wrappers (platform dependent).

Investment objective

To preserve capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect low levels of reward and a low correlation to stock market behaviour, including modest fluctuations in values.

Risk category

The strategy is managed in accordance with DP risk profile 3 and is part of their Risk Target Managed ('RTM') offering. The strategy's expected volatility is targeted to stay within the assigned DP risk profile's boundaries.

Headline positioning

- The strategy remains at the upper end of the corresponding Dynamic Planner risk profile with a bias in equity exposure to the US and Asia-Pacific ex. Japan.
- We maintain a diversified approach to our fixed income exposure, with increased allocations to corporate and inflation-linked bonds as well as to strategic bond managers.
- Cash levels remain reduced following our allocation to the thematic and global sector in December last year.
- There remains a focus on high levels of liquidity in everything we own.
- Market neutral alternative investments continue to act as stabilisers.
